4. To print the information, go to the Printable Page option on the right side of the window

Details – NEW GISWeb

1. To get information on a certain parcel click on the three dots in the upper right corner of the window
2. To get further information you can use the dropdown arrow to see all the options
3. You can hit the print icon to print this information

Note: If you just click on a parcel using the Identify/Pan tool it will only bring up basic information for the parcel on the details pane. If you want the full information and dropdowns you must use the select tool.
