Maps

1. To view/show information on the map click on the Maps tab
2. Click on the dropdown under Map Themes to see several preset layers
3. You can also hit the plus (+) symbol next to any of the groupings on the legend to see what layers might be available
4. Check the box next to the layer and either hit refresh map to see it show up on the map or zoom in/out to have the new layer turn on
5. You can click on the name for more information on that layer
