GIS-Web [See FAQ for details.](#)
[County Login](#)

To begin your search, simply enter full or partial values in any of the fields provided and click Search. Entering values in more than one field will search for records that match those values.

If you receive unexpected results, please consult the [FAQ](#) for potential explanations.

Basic Search

Primary Property Address		Owner	Parcel
House # <input type="text"/>	Unit <input type="text"/>	Name <input type="text"/>	ID <input type="text"/>
Street <input type="text"/>		(e.g. Doe, John)	(e.g. 07800-00-00-02200)
Can't find a Street name?			

Subdivision	Recent Sales
Name <input type="text"/>	From <input type="text"/> To <input type="text"/> (mm/dd/yyyy)

5. Location Search will allow you to search by address, point of interest, street or coordinates.

The screenshot shows a web interface for GIS-Web Navigation. On the left is a navigation menu with links: Basic Search, Advanced Search, New Address Search, Location Search (highlighted with a red underline), Go To Mapping, Full Disclaimer, Help, and FAQ. Below the menu, it states 'Site maintained by: GDS', 'Email GDS (434) 296-5832', 'Assessment questions: Email Real Estate (434) 296-5856', 'To access GIS layers: GIS Data Download Page', and 'Site last updated on...'. The main content area is titled 'Location Search' and contains four search options: 'Building Address' (selected with a radio button), 'Street or Intersection', 'Points of Interest', and 'Coordinates'. The 'Building Address' section has fields for 'House #', 'Unit', and 'Street'. The 'Street or Intersection' section has dropdowns for 'Street', 'Cross Street', and 'Route'. The 'Points of Interest' section has dropdowns for 'Type' and 'Name'. The 'Coordinates' section has a 'System' dropdown set to 'GEOGRAPHIC', and fields for 'Latitude' and 'Longitude' with degree, minute, and second indicators and 'N'/'W' suffixes. At the bottom right of the form are 'Clear All' and 'Search' buttons.

Searches – NEW GISWeb

1. Find Parcels (Basic) – use this to search for a main parcel, owner, address

- NOTE: If you search for more than one thing at a time, the parcel will have to meet all the criteria not just one of them (ex. Owner: Monticello, Parcel: 78-22 will look for parcel 78-22 owned by Monticello)
- Click on the search function on the left side of the screen
- Under the dropdown you will see many different search types
- For basic you can type in address, owner, parcel (autofill, must use hyphens), and the short parcel ID (also autofill and must use hyphens)
- Type in the criteria you would like and hit search
- You can then hit “Show All on Map” or double click on a single entry to zoom you to that area in the map.

2. **Find Parcel (Advanced)** – use this to also search by further criteria such as zoning
 - Same steps as above but this one gives you more ways to search, for example value, zoning, land use, etc.
3. **Find Parcels by Subdivision** - use this to search for all parcels in a given subdivision
 - You can either scroll to the name you want to find or start typing and it will autofill

4. Find Parcels by Sale Date – use this to search by sale information

- You can use this function to search by sale date, sale price, and/or subdivision

5. Find Roads – use this to search roads

- You can use this function to search by road name or route number, they both autofill

6. Find Public Notice Signs – use this to get information about a public notice sign

- You must know the sign number to type in and zoom to that area

7. Find E911 Road Signs – use this to search the road sign itself and the intersections where it is located

- You can use this function to search by road name, it is autofill

8. Find New Addresses – use this to search by building permit to see if an address has been given

- You can use this function to search by permit, year, or street.
